

Type of drive	Electronic
Working capacity	3500 m <sup>2</sup> /h
Cleaning width	700 mm
Squeegee working width	980 mm
Operating tension	24 V / 240 Ah
Battery autonomy	2.5 - 4 Hours
Cylindrical brushes	2 x 700 mm
Brushes speed	785 rpm
Solution Tank / Recovery tank	100 lt / 105 lt
Suction motor	580 Watt
Suction Vacuum	160 mbar
Dimensions mm	L 1575 x H 1320 x W 780
Weight	262 kg

## Coral 70s

Code: K0800021

The Coral 70s Ride-On Scrubber has two cylindrical brushes of 700mm and a cleaning width of 700mm.

The two cylindrical brushes are designed to wash and collect the dirt into a collection box that drains the exceeding water to the floor and is picked up by the squeegee. The device "brush dry" avoids water dripping at the end of the operation.

All Coral models are provided with the operating system "automatic" to turn on all functions and one switch "break washing" to stop the automative cleaning function. This operating system optimizes the washing procedure at the end of the work with a correct sequence of an automatic programmed shut-off. The operator can work by activating just one single button. The brush pressure is adjustable and constant in different positions, independent from the brush wear.

Coral 70s offers the latest modern cylindrical brush technology and is suitable for fast cleaning and maintenance and for floors with large joints.
