The Diamond 100 has the possibility to assemble a side brush that, without affecting the performances of the standard machine, increases the cleaning width from 100 to 120 cm.

The side brush assembly acts upon the floor with a pressure of 35 kg and is equipped with a disc brush of 345 mm. It separately supplies detergent because it has its own valve.

The side brush can be activated or deactivated directly from the instrument panel by pressing a push button and furthermore, during operation, it is lifted automatically during reverse movement, in order to avoid damages on the squeegee. No doubt the Diamond 100 with side brush is simply amazing.
